

Transformation for His Majesty's Treasury (HMT)

Salute helped HMT modernise OSCAR, a core government finance tool, improving performance, reliability, and user confidence.

Project data

-  **Deployment location:** United Kingdom
-  **Deployment Type:** Infrastructure optimisation and managed service transition
-  **Key Capabilities:** Infrastructure standardisation, environment alignment, performance optimisation, managed operations

Our customer's business priority

- Improve stability and performance of a mission-critical financial system.
- Standardise environments for consistent development and testing.
- Maximise value from existing infrastructure and licensing.

Problems our customer faced

- Inconsistent infrastructure across production, test, and staging.
- Performance bottlenecks and unreliable user acceptance testing.
- Underutilised software licenses and limited system visibility..

Solutions provided by Salute

- Delivered full infrastructure review and rightsizing initiative.
- Standardised database and application servers using uniform RDS instances.
- Introduced enhanced monitoring tools and dashboards and an Integrated Management System (IMS) for ongoing operations.
- Provided service desk support and continuous optimisation.

Business Impact

- **Stabilised and optimised critical infrastructure**
improving system performance and reliability across all environments
- **Improved operational efficiency and scalability**
maximising licence utilisation and creating a standardised, future-ready foundation
