

Achieving four ISO standards with zero non-conformities

Salute supported **Kao Data** in developing and implementing an Integrated Management System (IMS) across Quality, Information Security, Environmental, and Health & Safety standards, achieving successful UKAS-accredited ISO certification.

Project data

Deployment location: London-Stansted-Cambridge corridor, UK

Deployment type: Integrated Management System (IMS) implementation

Scope: Development, implementation, and accreditation of ISO 9001, ISO 27001, ISO 14001, ISO 45001

Our customer's business priority

- Achieve ISO accreditation to ensure compliance and operational resilience.
- Strengthen corporate governance and stakeholder confidence.
- Embed continual improvement and proactive risk management.

Problems our customer faced

- Complex, multi-standard requirements for critical facility operations.
- Need to integrate systems to ensure compliance and environmental performance.
- Tight timeframe for certification without disrupting operations.

Solutions provided by Salute

- Implemented a fully integrated management system across all four ISO standards.
- Aligned processes, policies, and controls with internal teams.
- Supported UKAS-approved audits, achieving zero non-conformities.

Business Impact

- **Strengthened operational resilience and governance**
ensuring compliance and stakeholder confidence
- **Achieved multi-ISO accreditation efficiently**
embedding continual improvement and risk management
