

Optimising resilience and operational efficiency across NHS Trust

Salute partnered with a leading **NHS Trust** to assess critical infrastructure, review upgrade options, and provide ongoing facilities management to maintain peak operational performance across the estate.

Project data

 **Deployment location:** London, UK

 **Deployment type:** Critical infrastructure audit and facilities management

 **Scope:** Assessment, options evaluation, and ongoing asset management

Our customer's business priority

- Ensure uninterrupted delivery of critical healthcare service
- Optimise existing infrastructure and plan for future improvements

Problems our customer faced

- Ageing infrastructure creating inefficiencies and operational risk
- Need to evaluate options against both risk and budgetary constraints
- Critical services could not be disrupted during assessment and maintenance

Solutions provided by Salute

- Conducted a best-practice assessment of critical infrastructure across the estate
- Evaluated upgrade options, balancing risk, compliance, and commercial considerations
- Delivered ongoing Critical Facilities Management to maintain peak performance during review

Business Impact

➤ Improved operational resilience and service reliability

ensuring critical healthcare services are maintained without disruption

➤ Informed, risk-aware infrastructure planning

supporting efficient, cost-conscious investment in estate upgrades
