

Delivering a rapid, secure connectivity upgrade for KBR

Salute supported KBR - a global provider of government and technology services - with the fast delivery of a new web circuit to meet increased remote working demands during COVID-19 lockdowns.

Project data

-  **Deployment location:** UK colocation facility
-  **Deployment type:** Connectivity and remote access solution
-  **Scope:** 1Gb internet circuit, VPN deployment, turnkey installation within live environment

Our customer's business priority

- Rapidly scale IT infrastructure to support remote access for global staff
- Ensure seamless integration with existing colocation services
- Maintain full operational continuity throughout deployment

Problems our customer faced

- Urgent requirement for enhanced connectivity within a two-week timeframe
- Live environment with no tolerance for downtime
- Strict COVID-19 on-site access restrictions

Solutions provided by Salute

- Delivered a new 1Gb dedicated internet circuit with /29 IPv4 address space
- Installed and configured Cisco AnyConnect VPN via a virtual ASA
- Managed full turnkey deployment — including cross-connects and rack terminations
- Maintained continuous communication with KBR and Datum to ensure on-time delivery

Business Impact

➤ Enhanced connectivity and remote access

enabling secure, reliable operations for global teams

➤ Zero operational disruption

achieved through careful coordination and risk-managed delivery
