

Rapidly deployed IT infrastructure for a leading UK law firm

Salute supported a major UK law firm relocating to a new Leeds office, delivering a turnkey Micro Data Centre (MDC) solution that overcame space and time constraints while providing ongoing maintenance and remote monitoring.

Project data

-  **Deployment location:** Leeds, UK
-  **Deployment type:** Turnkey Micro Data Centre
-  **Scope:** Design assessment, deployment, remote monitoring, ongoing maintenance

Our customer's business priority

- Enable IT continuity during office relocation
- Maximise space efficiency while meeting performance and security requirements
- Reduce reliance on on-site IT and FM personnel

Problems our customer faced

- Limited available space and tight relocation timeframe
- Traditional comms room approach impractical on-site
- Need for ongoing remote monitoring and operational support

Solutions provided by Salute

- Assessed solution options to balance budget, programme, performance, and risk
- Delivered turnkey MDC with inbuilt cooling, UPS, fire suppression, power distribution, and security
- Introduced Environmental Monitoring System for remote management
- Small-footprint deployment enabled rapid commissioning within two weeks

Business Impact

- **Ensured seamless IT operations during office relocation**
supporting critical services while reducing on-site resource requirements
- **Future-ready, flexible infrastructure**
allowing relocation or expansion without major construction works
